Choices for Cheney  
c/o Community Development  
City of Cheney  
12 Anderson Road  
Cheney, WA 99004

Greetings All,

The new city of Cheney comprehensive plan has recently come to my attention and I would like to make a few comments.

Overall I love the plan and feel it offers a wonderful redirection of the downtown area that will enhance the city center immensely for decades to come. I however object to the proposed changes northeast of Cheney noted on your planning map by number 21. I feel this will adversely affect the water quality and habitat of the treasured Turnbull National Wildlife Refuge. We have lost far too much land to urban sprawl and I would hope that the wise elders in the Cheney leadership would see that this does not happen on their watch. Additionally Turnbull is a regional treasure in addition to the benefits Cheney enjoys from its near proximity. It should be number one on your 'do not touch' list.

Thank you for considering my comments.

Sincerely,

James Conaty M.D.
